

**UK FIREARMS CATALOGUE** ISSUE 1

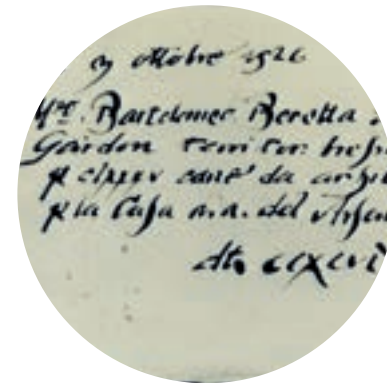

Welcome to Beretta, where  
**500 years of tradition**  
meet the latest **technology**.

Beretta represents 500 years of refinement and professional excellence, thanks to the high standards of quality and constant innovation. We put all our heart, mind, expertise and will into it to always give you something new, surprisingly elegant and super reliable to enhance your shooting experience every time you use a Beretta firearm.

## A tale **focused** on **experience** and **quality**.

It all began on October 3rd, 1526, when Mastro Bartolomeo Beretta from Gardone sold 185 harquebus barrels to the Venice Arsenal, receiving a payment of 296 ducats. Beretta's official start is evidenced in a small piece of paper, an "invoice" kept in the historical archives of Venice.

Today, the Beretta family has led the company for 15 generations and operates in support of outdoor and sport lovers, defense and law enforcement, providing them with firearms, clothing and accessories featuring the latest technology and the skill of expert craftsmen who have handed down the tradition of gunsmithing since the Renaissance.

# HUNTING

## Beretta **Tribe.** The largest **family of** **hunters** that ever existed.

For some it's a gentlemen's hunt, for some it's hanging out with buddies. For some it's a big family, for some it's a crew. For some an after-work group, for some it's an alumni network. For some it's being immersed in nature, for some it's savoring its most authentic taste. For some it's a woman thing, for some a father and son thing.

For us, all these people together make up the #berettatribe, a community of hunters moved by a connection to nature and a proudly sustainable lifestyle.

Hunting is a passion  
we share with you.

**Performance is a result  
we owe you.**

Our long expertise in hunting allowed us to create the best products for small, big and waterfowl hunters. Beretta guns combine the superior ballistics of Steelium® technology with 500 years of barrel-making experience, unmistakable design, reliable mechanisms, and the minimal maintenance requirements that made Beretta a world-renowned brand.

OVER & UNDERS

# 686 Silver Pigeon I

686 Silver Pigeon I

## 686 SILVER PIGEON I

The 686 Silver Pigeon I is Beretta’s most popular over&under shotgun of all time. Based on the superb 680 platform, with its unmistakable low, slim action and legendary, ultra reliable mechanism; it won the hearts of shooting enthusiasts the world over. The 686 Silver Pigeon I incorporates the perfect ballistics of Beretta’s highly reputed Steelium® Optima-Bore® HP barrels

and it features a defined floral engraving, which is further enhanced with images of grapes on the vine and the iconic Beretta Three Arrows logo on both sides of the action. All of which combines to make the 686 Silver Pigeon I the most elegant, well-balanced and quick-to-shoulder, factory-made shotgun in the world.

Model	Fleur de lys	Gauge	Chamber (inches)	Barrel (inches)	Rib (mm)	Chokes (type)	Accessories	Drop (mm)	Cast	Approximate weight (kg)	Pad

# 687 Silver Pigeon III

687 Silver Pigeon III

## 687 SILVER PIGEON III

The 687 Silver Pigeon III shotgun represents an elegant evolution of the Silver Pigeon I, designed for shooters looking for the reliability and minimal maintenance requirements of the 680 platform, presented with attractive aesthetics and a superior wood finish. The fine game scene engraving is embellished by a special sparkle in the bas-relief areas for a pleasant contrast

effect, while exquisite gloss finish enhances the grain of the stunning grade 2.5 wood, protects it from rain and improves longevity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels.

# 687 Silver Pigeon V

687 Silver Pigeon V

## 687 SILVER PIGEON V

The Silver Pigeon evolves with the V version: the efficiency, reliability and minimum maintenance requirements inherited from the 680 platform characterised by a new look together with a superior wood grade. The fine engravings are made using state-of-the-art premium laser technology and are embellished by a special sparkle in the bas-relief areas, which creates a pleasing contrast effect, highlighting the deep scroll motifs on the receiver, opening lever, trigger guard, locking shoulders, pins and forend release.

The exquisite gloss finish enhances the grain of the stunning grade 3 wood and protects it from rain and humidity. All these features are combined with the excellent ballistics guaranteed by the Steelium® Optima-Bore® HP tri-alloy steel barrels. Available as Hunting or Sporting versions, the 687 Silver Pigeon V is the shotgun for those who like to stand out with a gun that never stopped evolving over the course of 30 years, becoming an icon of quality and elegance.

# Ultraleggero

Ultraleggero Kick-off®

## Ultraleggero

The Ultraleggero begins a whole new chapter in the history of lightweight over&under shotguns, pushing the boundaries of design beyond all previous imagination; delivering the strength and reliability of a steel receiver but with an exceptionally low weight, something that had only previously been achieved with aluminium receivers. Thanks to the use of state-of-the-art engineering techniques, Beretta “skeletonised” the receiver and reduced

weight in several components of the shotgun, including only the structural elements that are essential for the robustness, the performance and the balance of this shotgun. The result is a lightweight yet sturdy shotgun, ideal for hunters looking for a fast-handling gun that swiftly gets onto the game. Enjoy your hunt, gun weight will no longer be a burden.

# 486 10th Anniversary

## 486 *Parallelo* 10<sup>TH</sup> ANNIVERSARY

486 Parallelo Anniversary is a limited edition released in 2023 to celebrate 10 years of the 486 platform. Starting from the seamless lines and flawless mechanism of the 486 Parallelo platform, it was issued in 486 numbered pieces with black burnished details on the opening lever, forend iron, forend

catch and trigger guard. The 486 Anniversary features a Master's touch engraving on the bottom of the receiver: the majestic pheasant in the centre has a laser-engraved base that was finely retouched by hand by a Beretta master engraver, to elegantly enrich the details on the bird.

HUNTING

## SEMI-AUTOS

# The 9 reasons to choose the Beretta semi-auto technology.

01

### PERFECT PATTERNS ON EVERY SHOT.

The ingredients of the great accuracy of the Beretta Steelium® barrels are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging process and the vacuum distension. Every Optima-Bore® HP barrel profile has been specifically designed and tested to provide perfect accuracy with every type of shell: lead, steel and steel High Performance.

02

### THE BEST RECOIL REDUCTION.

Kick-Off®, Kick-Off® Plus and Kick-Off® Mega ensure you up to 70% recoil reduction giving you more stability, comfort and control for faster target acquisition. More comfort for you, especially when you enjoy shooting hundreds of shots in a single day, and enhanced durability.

03

### UNBELIEVABLE RELOADING SPEED (+36%).

The Beretta gas-operating system is fast like an eye's blink. That's why it's called B-Link®. The power of the gas-system, combined with the precision of the rotating bolt, ensure you a fast, reliable and smart cycling. You can spend all your magazine's cartridges before the 1st round touches the ground.

04

### ALL-LOAD PROVEN RELIABILITY, FROM 24 TO 64 G.

Beretta gas-operating system B-Link® is the world's most reliable system. The closing force is stronger because, when the reloading cycle begins, the energy available to unlock the bolt is significantly higher. Higher energy when opening allows higher closing force, preventing the bolt from unlocking.

05

### COMFORT AND EASY TO ASSEMBLE.

The Extralight® recoil pad is 30% lighter than a standard recoil pad and much more resistant to abrasion, aging and the elements. Its closed cell structure avoids liquid absorption and its structure delivers comfort, stability and excellent recoil absorption. The B-Lok® cap, the magazine cap exclusive to Beretta, ensures a perfect and secure closing with just 60 degrees of rotation instead of multiple turns.

06

### CLEANER THAN EVER AND EASIER TO CLEAN.

With B-Link®, the only weak point of the gas-operating system has been practically reduced to zero. The re-engineering of gas ports and the systematic reduction of all the mechanical frictions reduce dirt to the minimum terms. You will experience the lowest maintenance need ever, and a smart, easy, fast and secure cleaning.

07

#### LOWEST MUZZLE JUMP.

Beretta semi-auto shotguns give you the lowest muzzle jump ever combining the stunning recoil reduction of the Kick-Off® devices with the unique ballistic features of the Steelium® Optima-Bore® HP barrels. More control after each shot, better performance for the next one.

08

#### ERGONOMIC AND EASY TO OPERATE.

The extended bolt handle and bolt release low profile lever allow for easier manipulation during the coldest and rainiest days. An enlarged loading port facilitates an easier and quicker reloading. The new extended lifter avoids thumb bite or glove catch while loading the gun.

09

#### DESIGNED FOR THE FUTURE, NEVER FORGETTING TRADITION.

The Beretta in-house design team works every day to match design with functionality, giving you original and aesthetically beautiful, simple solutions that optimise the shape, weight and ease of use.

## DT11 BLACK EDITION

Already packed with the renowned balance and performance features of the legendary DT11 over&under platform, this new Black DLC iteration steps up with a renewed resistance and look. The DLC coating improves durability, resistance to corrosion and wear, while adding a modern black look, enriched by contemporary acid green details. The carbon fibre top rib allows for less weight and better swing, while leaving the possibility to adjust shooter's burden with the B-Fast® balancing system on the

stock and the barrel. The Steelium® Pro barrel technology embodies the final signature for DT11 accuracy: an internal profile with triple forcing cone reaching up to 450 mm, reducing recoil and muzzle rise, while ensuring constantly dense and uniform shot patterns. Available in the Sporting, Trap and Skeet variants, in different barrel lengths and stock drop options, DT11 Black DLC becomes stronger than time.

# 694

694 is the over&under platform designed specifically for clay shooting, and with a precise goal in mind: to help shooters increase their success rate. Thanks to a meticulous mechanical and ergonomic design process, the 694 is perfectly balanced, natural and immediate when shouldering. The shape of the action and the stock provide increased field of view, while the new

forend iron system allows to maintain the opening load constant over time, and the Steelium® Plus barrels guarantee a dense, uniform pattern every time. In addition to the Sporting and Trap version, the 694 is available also in Skeet, Down-The-Line, ACS (with adjustable top rib), Vittoria and Pro version (with adjustable TSK® stock).

## **Accuracy, power, speed:** these are the imperatives for a **practical shooter.**

Beretta's products designed for this discipline start from the strong base of the well-established 90 and 1301 platforms, but they have been internally redesigned alongside practical shooting champions to offer the best solutions for beating the clock and shooting down as many targets as possible.

Constant innovation work on ergonomics, balance, trigger and accessory compatibility has shaped Beretta pistols and shotguns to the shooter's needs: the great success of 92X Performance and 1301 Comp Pro and the results of the Beretta athletes who use them is a proof.

**1301**  
*Comp*

The Beretta 1301 Comp semi-auto shotgun is designed to win tactical competitions right out of the box. Combining the technology of Beretta's best sporting shotguns with the requirements of the most demanding tactical shooters, it cycles faster than the other competition shotguns, handles like a dream and has oversized controls for super-easy operation.

It is available in two barrel lengths (21 and 24") and its receiver is drilled and tapered for rail mounts, so that it can be equipped with optics or tactical aiming devices without any gunsmithing. And thanks to its Optima-Choke® HP interchangeable choke system, it can also be adapted for other uses and will always perform like a Beretta.

# TECHNOLOGIES

## Providing **innovation:** our **tradition** since 1526.

Every day, we are pushing the boundaries of research: our engineers are constantly working to find new and better solutions for our products, offering hunters and shooters all over the world the highest level of quality, performance and safety.

**Creating value** for every shooter through continuous research.

With more than 220 active patents and extensions, out of a total of about 1.400 registered, Beretta's R&D plays a central role in the innovation processes, being able to rely on particularly advanced computer-aided design and simulation systems.

All research, development and production activities are in-house up to product industrialisation. In addition to ensuring ever-higher product performance, technical innovation allows us to optimise processes, reducing inefficiencies and ensuring the best quality/price ratio.

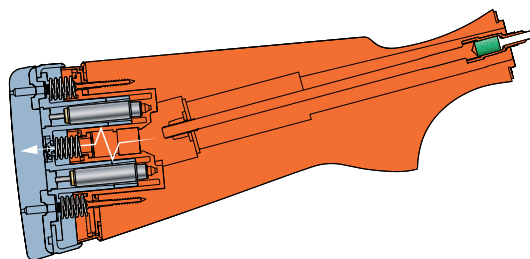

## TECHNOLOGIES

# Kick-Off®

World's best recoil and muzzle rise reduction

**KICK-OFF**

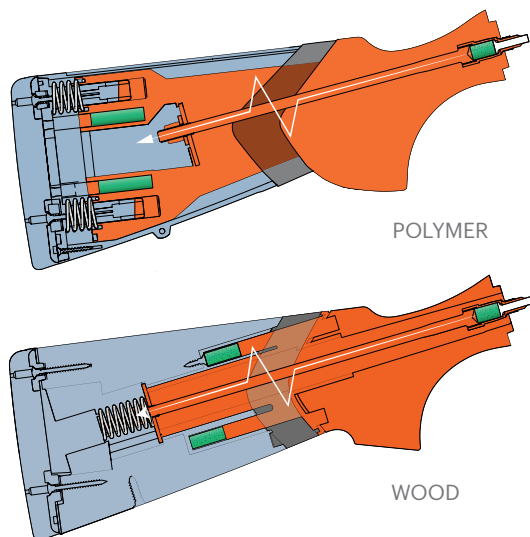

-60%

**Kick-Off®** is the first recoil reduction system developed by Beretta using hydraulic shock absorbers similar to those used in the automotive and aeronautical industries. It consists of two shock absorbers inserted close to the butt plate, completed by return springs, which effectively act on the first recoil peak, reducing the perceived recoil up to 60%. A third elastomer shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

**KICK-OFF PLUS**

-40%

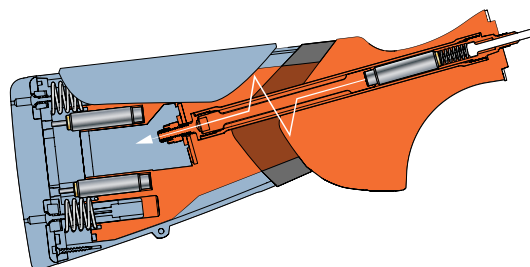

**Kick-Off® Plus** consists of two elastomer shock absorbers, positioned close to the rubber insert and equipped with return springs, which effectively act on the first recoil peak, reducing its perception up to 40%. A third elastomer shock absorber, inserted in the tie rod, absorbs the impact of the slide against the receiver, reducing the second recoil peak, the muzzle rise effect and the vibrations caused by the movement of the slide.

FIXED PART

MOVING PART

**KICK-OFF** MEGA

-70%

**Kick-Off® Mega** is the most powerful recoil reduction system available today, ideal for 89mm chambered shotguns, especially when you enjoy shooting high loads and hundreds of shots in a single day. It effectively combines 3 different devices that work synergistically, reducing the perceived recoil by up to 70%, ensuring greater stability, better control and faster target acquisition. Two hydraulic shock absorbers, similar to those used in the automotive and aerospace industry, positioned close to the rubber insert, together with return springs, effectively act on the first recoil peak. A third hydraulic shock absorber, inserted in the tie rod, acts on the second recoil peak caused by the impact of the slide against the receiver, further reducing the muzzle rise effect and the vibrations caused by the movement of the slide.

**B (STEADY)**

The **B-Steady®** system divides the stock into two sections: stock and pistol. The point of absorption of the recoil is in an advanced position, integral with the pistol, which is free to move back, leaving the stock stable and avoiding the annoying sliding of the nose piece on the cheek. The face remains firm and perfectly steady on the stock, without ever losing the line of sight.

\* The indicated lengths are based on 30" barrels.

The ingredients for the stunning performance of the Beretta **Steelium® barrels** are: the exclusive tri-alloy Beretta steel (Ni, Cr, Mo), the deep drilling, the cold hammer forging, the vacuum distension and the 80 mm extended forcing cone. The inner profile of the Optima-Bore® HP barrels has been designed and tested to provide perfect accuracy with every type of shells: lead, steel and High Performance steel. This results in perfect patterns on every shot.

The **Steelium® Plus** barrels have a triple forcing cone that reaches a length of 320 mm (in a 30" barrel). In **Steelium® Pro** barrels, the length of the forcing cone is further extended, up to 450 mm (in 30" barrels). This progressive inner profile of the barrel provides smoother shots with reduced muzzle rise and guarantees perfect, dense and uniform patterns with any type of ammunition.

## TECHNOLOGIES

# Aqua Tech Shield

Superior resistance to corrosion and wear

The innovative and environmentally friendly Aqua Tech Shield surface treatment is designed to provide maximum protection from external agents' attacks. Combining the best selection of materials with the most powerful protective treatments, Aqua Tech Shield technology provides internal and external protection from corrosion and wear every day.

A hybrid organic-inorganic coating, with a high content of Nano Ceramics, high density and high level of reticulation. After thorough laboratory and usage tests, compared with treatments such as Brunton and Cerakote, Aqua Tech Shield has demonstrated superior technical resistance to corrosion, chemical and weathering agents, ageing, abrasion, scratches, and the most extreme temperatures, while maintaining uniformity, adhesion, hardness, aesthetics, and gloss even after the most extreme uses.

Aqua Tech Shield enables the application of a wide range of new colours and textures, compared to other finishes that have limitations in production instead. That's why Aqua Tech Shield is the ideal coating for those who want to add some colour to rifles, pistols and semiautomatic shotguns, especially thanks to all the camo options available. And because of its exceptional adhesion and durability characteristics, colours always remain uniform and maintain their perfect aesthetics, even after long periods of use in harsh conditions.

Compared to other surface treatments, Aqua Tech Shield is a catalysed water-based product that does not involve the use of solvents or dangerous substances: this makes it totally non-toxic and with zero environmental impact. The gradual application of Aqua Tech Shield treatment on an increasing number of Beretta products is just one of the many initiatives that are part of the Beretta BEPlanet project: a commitment to make our future more sustainable through concrete and responsible actions.

## TECHNOLOGIES

# DLC

## Coating technology, diamond-like carbon

DLC is a thin film of amorphous carbon that, when gets in touch with some materials such as steel, transfers to it many of the beneficial properties commonly associated with natural diamonds, i.e. hardness and resistance to chemicals and scratches. Already used in several technologically advanced industries such as automotive, medical, and racing, DLC is now the most durable, innovative, and environmentally friendly coating Beretta applies to its products. Compared with the treatments previously adopted, DLC offers important advantages that make the coated firearm very resistant:

- Very high resistance to corrosion and alkaline or acidic solutions, including acidic palm sweat that increases the risk of leaving marks on barrels
- Strong resistance to ageing and rust for a very long-lasting life
- Remarkable anti-scratch and anti-shock properties due to the hardness characteristics typical of natural diamond

For its application, DLC does not involve the use of solvents or dangerous substances: this makes it also non-toxic and environmentally neutral.

**LEGAL NOTES:** while every effort has been made to make this catalogue as complete and accurate as possible, changes may occur at any time in the illustrations, descriptions, colours shown, and technical specs listed. Beretta provides ongoing improvements to its products and consequently, all specifications can vary without notice.

## SERVICES

# Gun Service

### **Beretta Service System**

The official Beretta firearm assistance

In Beretta, the maintenance of your firearm is carried out by a professional Beretta gunsmith, a member of the same team who gave life to your gun. Our know-how, the use of the last generation equipment, authentic spare parts and accessories ensure the best possible care for your Beretta firearm.

Today our gunsmiths are able to provide you the best service on:

- Barrel maintenance and treatment
- Wood making and treatment
- Mechanical parts maintenance, repair and replacement and much more

Contact your local Beretta dealer to receive assistance on your firearm.

## Got a **new** Beretta firearm? Extend your warranty!

Register your firearm on <https://gmk.co.uk/beretta-warranty> and extend your warranty\*.  
Enter Beretta community and discover a new world of benefits.

\*Registration is due within 30 days from purchase. Terms and conditions: <https://gmk.co.uk/beretta-warranty-terms>

## Beretta digital user manuals: all the tips you need, always at your fingertips

With just a click, you can access the user manual for your Beretta firearm right from your smartphone, find all the info you need, and go on with your adventure straight-away!

The new Beretta digital user manuals are:

- Always accessible wherever you are
- Always updated
- Easy to navigate and search
- Available with additional support capabilities, including HOW-TO videos showing you how your firearm works and how you can take care of it

Find your manual on: [usermanual.beretta.com](https://usermanual.beretta.com)

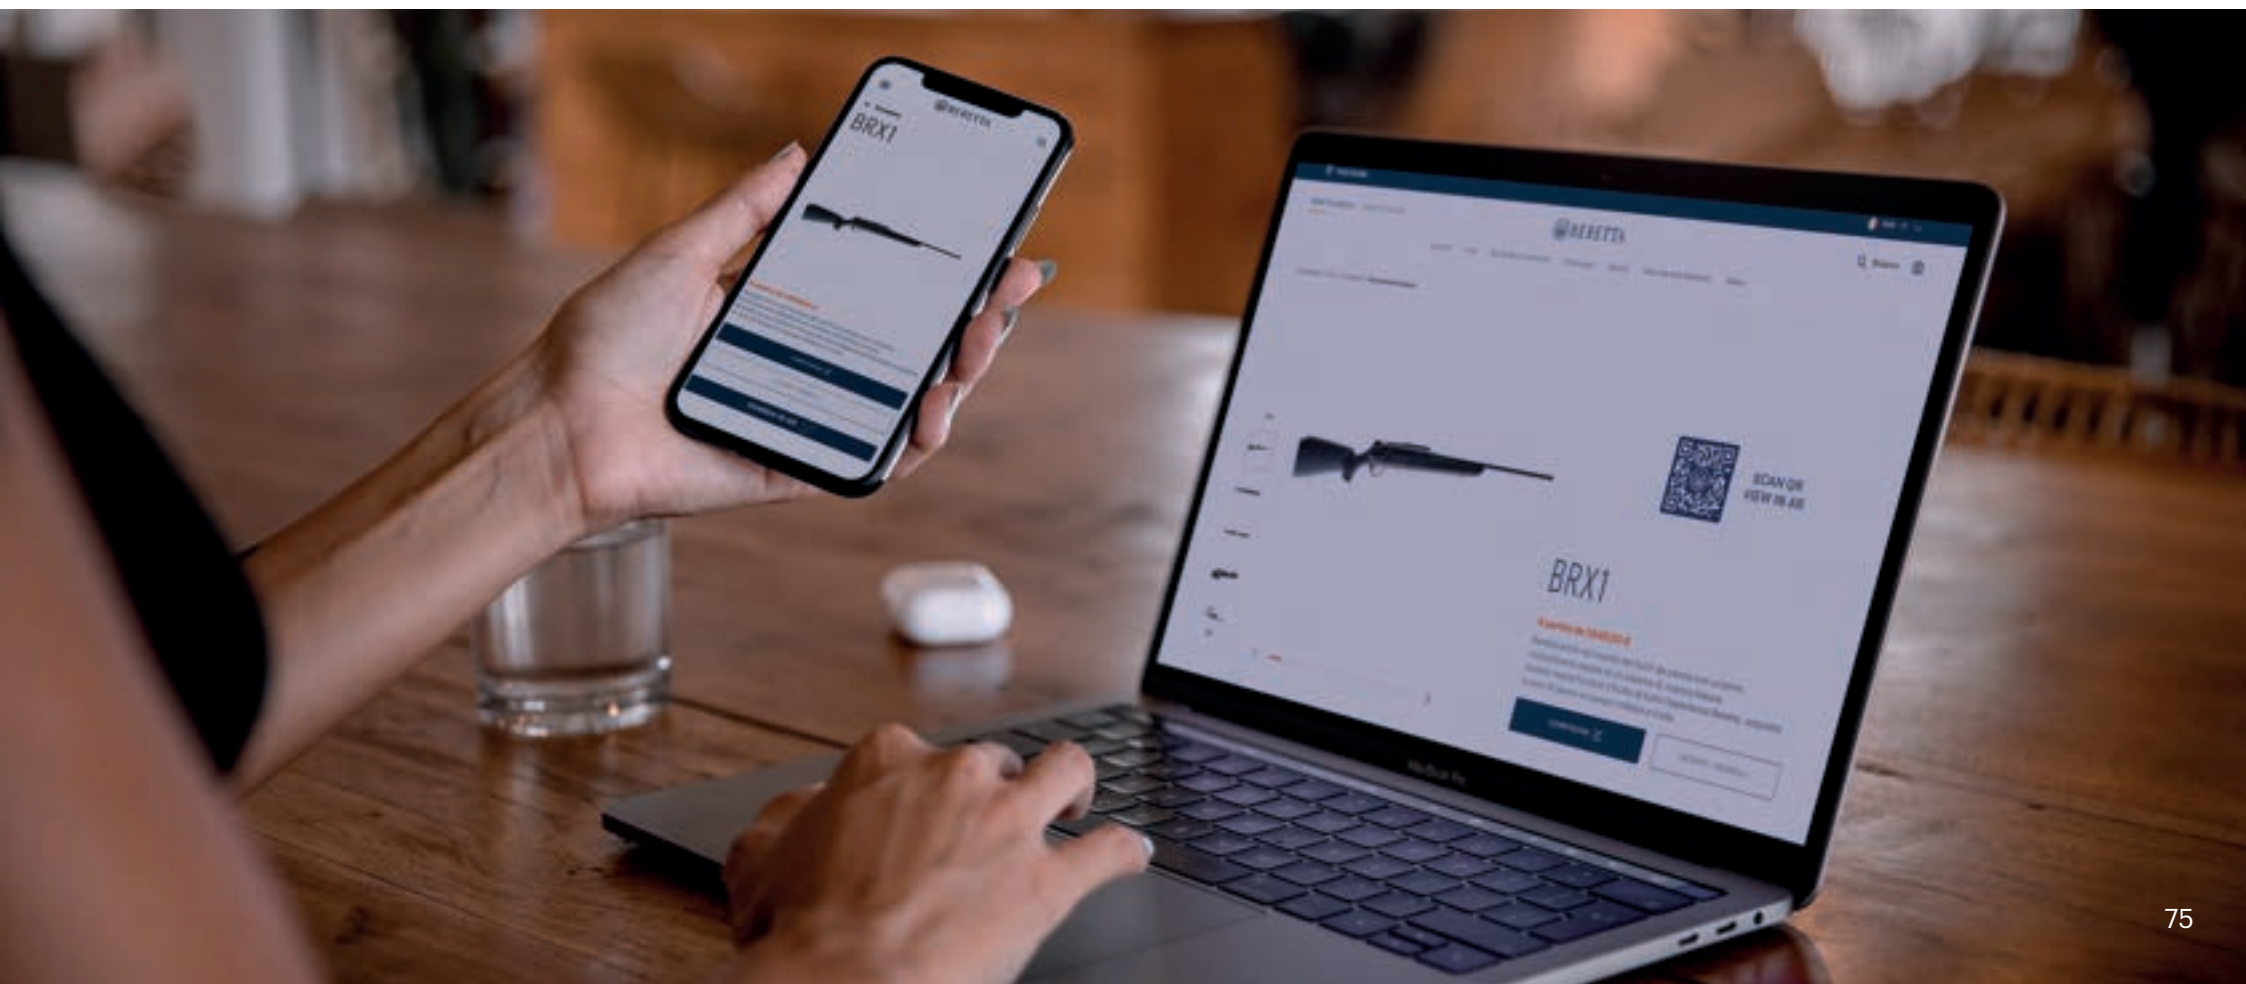

## SERVICES

# Augmented Reality

Check the product pages of BRX1 and semi-auto shotguns in this catalogue: a QrCode allows you to view and explore the selected firearm in Augmented Reality using your smartphone. Discover Beretta guns like you've never seen them before and try this new feature now!

We create endless possibilities in a unique piece of **engineering art.**

Discover the ultimate expression of 500-years old Italian gunsmithing. Pietro Beretta Selection is the luxury division of Beretta, where every dream of hunters and shooters become a reality.

In the PB Custom Atelier in Gardone Val Trompia our gunsmiths, stock makers, engravers and gun case makers shape fully customisable guns whose unique style and uncompromising quality suit their owner's identity, whether it's traditional, unconventional or contemporary and high-tech.

Discover the PB Selection products and their infinite options on [pietroberetta.com](https://pietroberetta.com)

A MACHINE DESIGNED TO WIN

## A **place** where to experience **style.**

The Beretta Galleries are the places where all the Beretta magic is collected and made magnificent. Each of these splendid boutiques is able to offer an immersive and complete experience from firearms to clothing to accessories. The highly qualified staff helps the hunters and shooters in the selection and construction of their new firearm: be it a pistol or a shotgun. There are no limits to customisation: only in this way can we be sure of making a true Italian piece of art.
