SINCE 1921

EXCELLENCE IN EVERY DETAIL

Fabled legacy, cutting-edge technology and uncompromised craftsmanship. As the world's most prestigious rifle and cartridge brand, Sako brings all these vital factors together like no other.

Sako products and way of working are based on a culture deeply rooted in the unforgiving Nordic nature. Overcoming these harsh conditions has always demanded perfection in every detail. All of our rifles comply with CIP and SAAMI requirements and are designed for and tested in ultimate conditions. We also produce high-quality centerfire cartridges with more than 100 different loads in 32 calibers for different targets and hunting purposes.

Times may change, but our mission remains the same: to offer our customers the very best in accuracy and performance.

We are hunters. We demand perfection.

BUILDING THE FUTURE

The core of the now 100-year-old Sako is the unique combination of people and technology.

In 2021, we celebrate our 100th anniversary and begin to plan the next 100 years. Before leaping into the future of hunting and sports shooting, it's good to take a look back to understand our long legacy.

We have always demanded perfection in everything we do and our every intention is to continue the tradition. We learn about our past, but then start to think what will come next. Together with our partners and customers we are building the future.

1921-1927

Sako is a special case in the Finnish industrial history. It was first founded in 1919, when the Finnish Civil Guards needed a workshop to repair Russian-made rifles obtained during the Civil War. The workshop was made economically independent on 1 April 1921, and that is the day which Sako considers its day of birth. Instead of only repairing, Sako also started to manufacture guns.

The first Sako rifles were made by combining barrels obtained from Switzerland and Germany with old Russian guns.

The m/28, Pystykorva – the Spitzhound, proved to be of even higher quality than the equivalent guns used by the Defence Forces.

1927-1944

In 1927, the workshop was made into Sako Ltd. At the same time, the company moved from Helsinki to Riihimäki, to the same industrial lot on which Sako still operates.

At the late 20s Sako started to manufacture cartridges, a decision that proved to be wise.

After the war, Sako had to find new articles to sell: the cartridge department made tools and small metal products – such as shells for lipsticks – and the mechanical workshop repaired guns.

1944-1961

Wartimes were busy for Sako. The number of employees rose to 800, of whom a significant number were women. Riihimäki was bombed, but Sako's factory site was spared any great damage.

In 1946 Sako returned to weapons manufacturing. This marked a new era for the company that started to export products to the United States. In 1952, the US was already Sako's largest export country and in 1953, the sales there surpassed Sako's domestic sales.

The field gun model L46 designed during the war sold well in Finland, the Nordic countries and Western Europe.

1961-1986

For Sako, the 1960s were a decade of growth and development. The ownership was transferred multiple times, but in the end the new company, Sako-Valmet, was comprised of three weapons factories: Riihimäki, Tourula in Jyväskylä, and Tikkakoski,

1986-1999

The path of the new company was rocky. In the mid-1990s, the company, now under the name Sako, continued only the manufacture of field guns and cartridges at its Riihimäki site.

2000-2021

It had been obvious for a long time that to achieve its full potential, Sako had to become a part of a larger entity in the weapons industry. That was accomplished at the turn of the millennium, when the major Italian company, Beretta, took an interest in Sako and obtained its shares. Beretta has supported the development of Sako and its volumes.

2021-

During the last 100 years Sako has adapted to the changing world. Now it is time to look into the horizon. New innovations and products are guaranteed, but the future is not just about technology: it is about people and understanding the needs and desires of hunters and sport shooters. We at Sako are not predicting the future – we are building it together.

Image: Museovirasto/Kari Rainer Pulkkinen

For a period of time, Sako was owned by a multi-industry company, Nokia.

Sako restarted manufacturing military guns in 1960s, as the company obtained an order for new assault rifles from the Defence Forces.

The Sako 75 product range was introduced in 1996. The success of this gun, the first one designed completely by Sako, turned the course of the company.

At 2020 Sako introduced the new Sako S20 hybrid rifle. The launch of the technically highly developed rifle neatly coincided with Sako's long-term production record.

During the last 100 years, quality has become a true Sako trademark.

MADE BY HUNTERS

For us, it's not just a profession – it's a passion, a lifestyle we share with our customers.

There's nothing more precious than sitting by the fire and sharing something special with your fellow hunters. It's no secret that Sako's global reputation is rooted in the unique skills and expertise of our employees, hunters, who also share this way of life.

Combining a passion with work creates something truly new. The insights we get out there in the forest support what we develop next at the job, and the stories shared are built into our future products. We know the difference good quality can make.

Read our stories at sako.fi/manufacturing

We take great pride in our work. Each rifle is carefully assembled by a single person, and each individual barrel is visually inspected. Every rifle goes through manual accuracy testing to ensure it can perform under 1MOA accuracy and is delivered with a certification that guarantees its quality and accuracy.

Sako's history goes back to the early 1920s. Since then, we've come a long way from manufacturing by hand to today's computer-aided R&D and CNC manufacturing. And yet, we have not forgotten the value of traditional gunsmith craftsmanship.

SAKO S20 – THE RIFLE THAT IS YOU

The new Sako S20 is the first true hybrid rifle, the one that both hunters and precision shooters can embrace. It's designed for passionate shooters who want to take and stay in control in every situation. The modular structure adapts to changing lifestyles, making S20 a truly future-proof bolt action rifle.

Designed for passionate shooters who want to take and stay in control in every situation.

SAKO S20

A LIFE-LONG JOURNEY

The interchangeable stocks ensure that your rifle can go wherever you go. They are ideal for when you need a fresh approach without having to invest in a new rifle.

M-LOK PLACEMENTS

The Precision forend has integrated M-LOK placements on both sides (two on either side) and on the bottom (3+1)

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
S, M & L	1040-1127 mm	510, 620 mm	3.5-4.3 kg

CALIBER / RATE OF TWIST:
5+1 magazine: 243 Win / 10" | 308 Win / 11" | 6.5 Creedmoor / 8" | 270 Win / 10" | 30-06 Spr / 11"
3+1 magazine: 7mm Rem Mag / 9.5" | 300 Win Mag / 10" | 6.5 PRC / 8"

ERGONOMIC HUNTING STOCK

The S20 hunting stock was designed with ultimate shooting comfort and ergonomics in mind. Having the best, most ergonomic grip on your rifle improves accuracy without compromising comfort. In an intense hunting situation, this can be the deciding factor between success and failure.

TACTICAL PRECISION STOCK

The S20 precision stock was created specifically for long distance and precision shooters. To ensure maximised control, accuracy and comfort, its features can be easily adjusted to your needs and complemented by multiple accessories via M-LOK placements.

SELECT YOUR SAKO S20

SAKO S20 ACCESSORIES

5 MM SPACER SETS
are available for adjusting
the length of pull.

MUZZLE BRAKES
are available for different
barrel contours.

QD SLING SWIVELS
are compatible with Sako
S20's or any other rifle's QD
sling mounts.

SCOPE MOUNT

Our high-duty performance scope mount, made from extremely strong aircraft-grade aluminium and steel, provides a strong hold for a rigid scope on the Picatinny rail. It comes in a variety of different ring heights (low, medium and high) and ring diameters (1 in, 30 mm, 34 mm and 36 mm).

THUMB REST

With the S20 thumb rest, you can easily improve your shooting position by placing your thumb on either the left or the right side of the precision stock. It enables a more secure and fixed hand position for more accurate index finger trigger control.

BARRICADE STOP

The barricade stop allows the shooter to support the rifle on barricades or obstacles without damaging the magazine and achieving a steadier position for maximum precision. It can be attached to any M-LOK compatible forend or hand guard.

MONOPOD

The M-LOK compatible monopod provides further stability and support when you need that extra precision. You can quickly engage the desired height with one push of a button. The mount also has a threaded micro-adjustment so that you can fine-tune your rifle's elevation by rotating the pod.

10-ROUND MAGAZINE

If you want extended magazine capacity, 10 round (6 Magnum) magazines are available. Sako S20 magazines were designed to support reloaders with their longer maximum cartridge length and to safeguard the bullet from recoil damage.

FOREND AND REAR STOCK

The takedown stock of the Sako S20 allows for great modularity, so that your rifle can be configured according to your preferences with different rearstocks and forends.

SAKO PREMIUM

Built by our talented rifle smiths in Riihimäki, exclusive Sako Premium rifles perfectly embody the Sako spirit.

Sako Custom concept gives you a chance to decide what rifle configuration of thousands of combinations is best suited for you. Build your rifle with multiple options in stocks, wood quality, engravings and other details. Sako Bespoke, in turn, represents our most exclusive Premium offering. No two Bespoke rifles are exactly the same as this unique model can be personalised to meet even the most ambitious vision.

CUSTOM-MADE SAKO 85 RIFLES

A rifle is so much more than a means to an end. It's a reflection of who you are, and as individual as you are. With Sako Custom, you can customise your very own Sako 85 rifle based on your personal needs and preferences. We offer thousands of different combinations for you to choose from. After you have made your decisions, our talented rifle smiths in Riihimäki will build the rifle according to your vision.

CONFIGURATOR MAKES CUSTOMISATION EASY

Sako Custom Configurator makes building your own custom rifle simple. You can choose how your rifle is put together, starting from stock model, wood quality, engravings and a range of other details. When you are satisfied with your choices, you can easily share the details of your custom rifle with your Sako Elite dealer.

SAKO 85 RIFLES

Versatility is the mark of true excellence. The Sako 85 rifles are built with demanding design criteria, based on long tradition and newest innovations, allowing you to choose the best option for any hunting or training purpose.

The Sako 85 rifle range includes several models with several stock styles and barrels. These options, combined with comprehensive caliber selection, will give you the ultimate bolt-action rifle: accurate, prestigious and durable. When you choose Sako 85, you choose value that lasts from father to son.

*Versatility is the mark
of true excellence.*

INDIVIDUALLY PERFECT

BOLT

Sako 85 bolt body is constructed from forged solid steel blank. One piece bolt body is machined from a blank so that it includes the bolt handle. This uniform construction is extremely rigid and robust.

EXTRACTOR & EJECTION

The Sako 85 has a famous extractor claw made of durable heat-treated steel. When the bolt forces the case back, the mechanical ejector fork ejects the case out of the rifle. The ejector is at the bottom of the rear bridge, not on the bolt face.

ACTION

Sako 85 actions come in six different sizes (CSA), providing reliability for each caliber and the very best functions for each cartridge size. All Sako 85 models feature controlled cartridge feed (RCS) to eliminate double feed or cartridge jams. The turn-bolt handle places the hand in a natural position during bolt operation, which allows for rapid repeated firing.

SAFETY

The special two-way Sako safety locks both the trigger and the bolt handle. The unique bolt release button of the Sako Safety System allows you to load or remove a cartridge from the chamber while the safety is engaged.

TRIGGER

The weight of pull of the single-stage Sako 85 trigger unit is adjustable from 1 to 2 kg (2–4 lbs). An optional single-set trigger is available for most Sako 85 models. All Sako 85 rifles have an extremely durable, all-steel trigger guard that protectsthe trigger. An exception to this are the Finnligh and Carbonlight models, which have a lightweight hard-anodized aluminium trigger guard.

MAGAZINE

The staggered, two-row magazine of the Sako 85 is made of stainless steel. The detachable magazine can also be loaded through the ejection port. The Total Control Latch (patent pending) of the Sako 85 prevents accidental magazine release.

BARREL

Sako 85 barrels are manufactured with a passion for craftsmanship and the very best knowledge of Sako. Barrel blanks are drilled, honed, cold-hammer forged, finished and finally individually inspected by an optical fine-tuning instrument: the human eye. Twist rates are chosen for each caliber to optimize accuracy and bullet performance. Sako 85 barrels, blued or stainless, have a non-reflecting, satin-like surface – with the exception of the Sako 85 Deluxe and Safari models that have a highly polished finish, and the 85 Finnligh II model that has a weather-resistant Cerakote coating.

STOCK

The ergonomics of Sako 85’s walnut and synthetic stocks are built for an optimal shooting posture. The excellent balance and smooth bolt operation of Sako 85 rifles enable fast, straight and accurate operation.

ADJUSTABLE CHEEK PIECE & LENGTH OF PULL

The cheek piece & length of pull can be easily adjusted to best suit you via the control buttons on the rear stock.

PISTOL GRIP

The ergonomic pistol grip gives you a natural and relaxed grip.

DOUBLE SLING-STUDS

Effortlessly carry the Sako 85 Black Wolf with a bipod whenever needed.

85 CARBONLIGHT

The Sako 85 Carbonlight is a high-end rifle designed for gear-oriented enthusiasts after any type of game. This ultra-light multi-purpose hunting rifle features a carbon fiber stock with a soft-touch surface, a right-hand palm swell and a cheek piece. With an approximate weight of only 2.4 kg, the Sako 85 Carbonlight with S-action or the new XS-action is exceptionally comfortable to carry, even on long treks. You can also pick a left-handed option and different action lengths, including M-action.

MUZZLE BRAKE

Carbonlight in L action size calibers are delivered with a separately packed muzzle brake.

TECHNOLOGY

The Sako 85 Carbonlight rifle is built using the same CFRP technology that is used in both car and aerospace industries. This makes it extremely light, durable and rigid, resulting in a one-of-a-kind rifle.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT	AVAILABLE AS LEFT-HANDED

85 SAFARI

The Sako 85 Safari is a bolt-action rifle made for the most demanding hunters. Each Safari rifle has a hand-polished barrelled action. This rifle features epoxy bedding for the best and most durable fit and accuracy. The stock is made from high-grade walnut featuring detailed rosewood fore-end cap and grip cap.

PREMIUM STOCK

The classic appearance of the handmade Safari stock is finished off with a custom-made Pachmayr recoil pad. The high-grade walnut stock features traditional hand-cut checkering, and the fore-end tip and pistol grip cap are made of ebony.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
L & XL	1045-1150 mm	620 mm	4.1-4.5 kg

85 FINNLIGHT

The Sako 85 Finnlightrifle is for those who foray deep into the wild to reach their goal. Hunters on mountain trails or on long-distance treks prefer high-performance rifles that are full-sized, yet lightweight. The fluted barrel of the Finnlightrifle is just one of the many features that make it ideal for a hunter seeking a perfectly trimmed light rifle. The Sako 85 Finnlightrifle is also an excellent choice for women and younger shooters.

STOCK

Sako 85 Finnlightrifle has a reinforced black polymer stock with a soft grey pattern on its grip surfaces and a Soft Touch surface treatment.

85 SYNTHETIC STAINLESS

The Sako 85 Synthetic Stainless, one of our most popular rifles, is effortless to operate and has the firmest hold you'll ever experience. Black grip areas against the black satin-like stock create an impressive profile. The stainless steel barrel and receiver are non-reflective and highly durable in any weather conditions.

STOCK

The stock features a cheek piece and an asymmetric palm swell, black gripping surfaces, and it has undergone a Soft Touch surface treatment.

SAKO 85 BEAR SERIES

Every seasoned hunter knows the importance of choosing the right tool for the task. When facing a true challenge, you must be able to trust the accuracy and reliability of your rifle.

The Grizzly, Black Bear, Brown Bear and Kodiak are purpose-oriented weapons for big game hunting. Due to optimised length, these rifles are easy to carry and well-suited for dense forest conditions and medium to close range situations. All four Bear models feature adjustable fast target acquisition iron sights and detachable staggered two-row steel magazine with the Total Control Latch, preventing unintentional magazine release.

Bear series rifles can be top-loaded and have controlled cartridge feed, an adjustable single stage trigger and barrel band for front swivel – plus mechanical case ejection. They are also equipped with integral dovetail rails for secure scope mounting.

When facing a true challenge, you must be able to trust the accuracy and reliability of your rifle.

85 GRIZZLY

The Sako 85 Grizzly adds prestige to the Sako Bear Series. Its high-grade walnut stock, medium-contour fluted barrel and blued action give it an elegant appearance and make it a pleasure to handle.

SIGHTS AND BARREL

The 85 Grizzly has rapid target acquisition iron sights with a full rear sight line and bead, and a fluted barrel with a swivel band.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
S & M	1045-1055 mm	540 mm	3.5-3.6 kg

CALIBER / RATE OF TWIST:
5+1 magazine: 308 Win / 11" | 7x64 / 10" | 30-06 / 11" | 8x57IS / 9.5" | 9.3x62 / 14"

85 BLACK BEAR

The Sako 85 Black Bear has a medium-contour fluted barrel, a matte black stock with soft grip surfaces and blued action and barrel. Its lightweight, compact size and good weather resistance mean it's a perfect choice for an active hunter. The Sako 85 Black Bear is extremely well balanced, making it ideal for situations that require rapid action.

SIGHTS AND BARREL

The 85 Black Bear has rapid target acquisition iron sights with a full rear sight line and bead, and a fluted barrel with a swivel band.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT

5+1 magazine: 308 Win / 11" | 30-06 / 11" | 8x57IS / 9.5" | 9.3x62 / 14"

85 BROWN BEAR

The Sako 85 Brown Bear is also available in action size XL. This extends the caliber selection of the Bear series to include 416 Rigby, 450 Rigby and 500 Jeffery. The laminate stock has been redesigned to accommodate larger calibers, while the barrel profile has been redefined for the new calibers.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT

Equipped with a hinged floorplate magazine in XL action size

85 KODIAK

The Sako 85 Kodiak was designed with a true hunter in mind. The straight, weatherproof stock is made of grey laminated hardwood and reinforced with two cross-bolts. The short, free-floating medium contour barrel features adjustable open sights and a band-type front swivel. The barrel is cold hammer-forged using high-grade alloy stainless steel. The bolt, receiver and detachable magazine are also made of stainless steel, and provide reliability even under severe weather conditions.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT

SAKO 85 LONG RANGE RIFLES

Long range hunting is extremely demanding. There is no room for compromises when you are shooting game from long distances: your rifle and other gear have to be match grade in order to guarantee a vital hit.

The Sako 85 Long Range rifle has been designed to overcome any distance and challenge you may face.

The Sako 85 Varmint rifles, in turn, are the perfect tools for targeting smaller marks, often with the help of a large objective and the rest under the weapon. For this purpose, these rifles boast a heavy barrel, a single-set-trigger, a pronounced pistol grip and a flat fore-end bottom.

There is no room for compromises when you are shooting game from long distances.

85 LONG RANGE

The Sako 85 Long Range rifle is designed especially for long range hunting. Specific details, such as a muzzle brake, 26” match grade barrel, double sling studs and a stock designed for the prone position, guarantee that you will hit your target even from extreme distances.

MUZZLE BRAKE

Flush design muzzle brake was added to reduce the recoil. Muzzle brake will make it easier to keep the target in sights after the shot.

STOCK

The Sako 85 Long Range has a flat fore-end that provides better support while shooting without a bipod. The double studs enable simultaneous attachment of both the sling and bipod.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
L & XL	1250 mm	660 mm	4.4 kg

CALIBER / RATE OF TWIST:
4+1 magazine: 300 Win Mag / 10” | 338 Lapua Mag / 10”

Equipped with a hinged floorplate magazine in XL action size

85 VARMINT

The Sako 85 Varmint rifle is a long range hunting rifle for small to medium game, built to deliver pinpoint accuracy for hunting and target shooting. The heavy, free-floating barrel diminishes vibration and recoil, which makes it easy to zoom in and stay on target. The Varmint rifle stock is made of walnut, enhancing both comfort and accuracy. In addition, it features an extra wide, flat-bottomed beavertail fore-end and a more pronounced pistol grip for a better bench shooting position.

BARREL

A heavy barrel and a wide flat bottom fore-end enable steady shooting on sandbags.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
XS, S	1030-1145 mm	510-600 mm	3.5-3.9 kg

CALIBER / RATE OF TWIST:

5+1 magazine: 22-250 Rem / 14" | 243 Win / 10" | 7mm-08 Rem / 9.5" | 308 Win / 11"

85 VARMINT STAINLESS

The Sako 85 Varmint Laminated Stainless rifle comes with all the same qualities as the Varmint model, only its stainless metal parts and stable laminate stock are optimised for rough conditions. The fluted barrel increases heat dissipation, decreases overall weight and gives this rifle its distinctive beauty.

PISTOL GRIP

The pronounced pistol grip is designed to improve the ergonomics of the prone position.

ACTION SIZE	TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
XS, S	1015-1105 mm	510-600 mm	3.7-4.1 kg

SAKO TRG RIFLES

The Sako TRG is an accuracy concept designed to accomplish a single-minded mission: to hit the target – whatever it takes, giving you unique performance that surpasses the highest demands for accuracy, reliability and versatility.

The TRG Accuracy Concept is designed to meet individual demands, adapting to each shooter's personal style, build and posture. The super target-grade barrel, made especially for the TRG rifles, is cold-hammer forged. The sturdy bolt with three locking lugs accurately feeds rounds from the centerline of a detachable staggered two-row magazine. All Sako TRG receivers are drilled and tapped for a Picatinny rail.

The TRG Accuracy Concept serves several military and law enforcement organizations as their primary sniper weapon system. The rifle is also used by long-range competition shooters and is a CISM competition winner.

The TRG Accuracy Concept is designed to meet individual demands, adapting to each shooter's personal style, build and posture.

TRG 22/42 A1

The Sako TRG 22 and 42 A1 are made for one specific task: to hit the target – whatever it takes. The 22 and 42 A1 have been taken to the next level with new features inspired by our flagship model, the TRG M10.

TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT
1015-1105 mm	510-600 mm	3.7-4.1 kg

CALIBER / RATE OF TWIST:
TRG 22 A1 (10 rounds in magazine): 308 Win / 11" | 260 Rem / 8" | 6.5 Creedmoor / 8"
TRG 42 A1 (5 rounds in magazine): 300 Win Mag / 10" (7 rounds in magazine) | 338 Lapua Mag / 10"

FULLY ADJUSTABLE REAR STOCK

All adjustments can be done quickly without using any tools. The stock can also be securely locked down when required.

MODULAR M-LOK FORE-STOCK

The M-LOK standard has a robust design and is compatible with a wide range of accessories. The M-LOK interface is also easy to use and offers a secure lock for many different applications.

DOUBLE PLUNGERS

The TRG 42 is equipped with double plungers, which make frequent cartridge ejection more seamless than ever.

TRG M10

BLACK & COYOTE BROWN

The TRG M10 is a bolt action, multi-caliber, manually operated, magazine-fed, shoulder-fired sniper weapon with a high-capacity magazine and fully adjustable stock that provides a single weapon system solution for many different applications. A high level of configurability makes the TRG M10 an extremely versatile platform: it easily converts from a true long range precision rifle to a more compact piece of equipment.

AMBIDEXTROUS CONTROLS

The ambidextrous controls are well within the reach of the firing hand and are large enough to be also operated with gloves on. The robust and fully adjustable trigger unit can be detached for maintenance and adjustment without further disassembling the weapon.

TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT	SWITCH-BARREL
1037-1216,5 mm	509,5-689 mm	6-6.5 kg

- 7+1 magazine: 338 Lapua Mag / 10"

FULLY ADJUSTABLE REAR STOCK

All adjustments can be done quickly without using any tools. The stock can also be securely locked down when needed by using tools located inside the weapon. The pistol grip has an interchangeable back strap in three different sizes; all three are included in the standard package.

TACTILE INDICATORS

Identification of modular components for different calibers can be done visually or from tactile indicators placed on each critical component.

SAKO RIMFIRE RIFLES

Many hunters begin their journey with their trusty rimfire rifle by their side. This is a tradition Sako Rimfire rifles proudly continue.

The Sako Quad is a special small game bolt-action rimfire rifle with interchangeable barrels. This makes the Sako Quad extremely versatile – you can change the barrel and switch calibers in couple of seconds. The Sako Quad is no ordinary rimfire rifle: it's a small bore hunting and training firearm that functions as its own system, complete with several options to choose between.

The Finnfire II, in turn, is a reincarnation of the classic Sako Finnfire from the 1990s. It is a perfect blend of Finnfire and Quad system, providing the best possible rimfire rifle experience.

Barrels can be easily changed using the Sako Quad barrel tool.

QUAD RANGE

The Sako Quad Range is an extremely versatile rimfire rifle, ready to accompany you to a small game hunt or to the range. An ergonomic stock combined with high adaptability makes for a unique, reliable rifle.

CALIBERS

Each Sako Quad caliber has unique characteristics and is designed for a specific targeting purpose. Calibers from left to right: 17 Mach 2, another version of the popular 22 LR; 22 LR, the universal caliber for target shooting and close-range small game hunting; 17 HMR, a high velocity varmint cartridge with excellent ballistics up to 150 yards; 22 WMR, the most powerful Sako Quad caliber – an excellent small game and varmint cartridge.

TOTAL LENGTH	BARREL LENGTH	OVERALL WEIGHT	SWITCH-BARREL
1015 mm	560 mm	4.5 kg	

CALIBER / RATE OF TWIST:

10+1 magazine: 22 LR / 16.5" | 17 Mach 2 / 9"

9+1 magazine: 22 WMR / 16" | 17 HMR / 9"

QUAD HUNTER PRO

The Sako Quad Hunter Pro combines the latest Sako features with the look and feel of a traditional Sako hunting rifle. The full-sized walnut stock resembles the famous Sako 75 design and offers the same accuracy as all legendary Sako hunting rifles.

COLOR CODING

Both barrels and magazines are color-coded and marked to indicate matching pairs.

NEW SAKO 90

The 90 is the latest evolution of the legendary Sako platform. Considered by many to have the smoothest bolt operation available in a production rifle.

Action

The 3 locking lugs provide an ultra-secure lock up. Once fired the ejector claw and new double plunger deliver faultless ejection of the cartridge, leading to a fast re-load. The re-shaped ejection port also ensures even more reliable ejection.

Model
Sako 90 Peak

Trigger

Whilst maintaining the legendary Sako crispness and consistency, the 90 features a new trigger with an incredible 1.3 millisecond lock time. It can be easily adjusted, by means of an Allen key, to 5 'clickable' weight settings and is also adjustable for length of pull.

Mounting System

Sako 90's with synthetic or carbon stocks features a split picatinny base, integrally machined into the top receiver. Wooden models feature a straight 17mm Optilock mount, for a clearer picture when used with open sights.

Barrel

New barrel profiles to maintain rigidity whilst minimising weight. Twist rates have also been changed to optimise accuracy with modern bullets.

Stock

A variety of new stocks in both traditional and modern materials. High grip surfaces and multiple adjustment offer fantastic flexibility.

Sako 90 Model Range

Hunter

Traditional wooden stock

Varmint

Heavier barrel with laminated wooden stock

Adventure

Durable synthetic stock with adjustable cheek piece

Peak

ACCESSORIES

Enhance your Sako experience with our wide range of accessories, available in original Sako accessory bags. With accessories, you can entirely re-define what you want your rifle to be. Some accessories are beneficial for hunters, whereas others are more suited to the shooting range.

MUZZLE BRAKES

Variety of muzzle brakes are available for different barrel contours and muzzle threads in stainless steel, black and many cerakote colors.

RECOIL PADS AND SPACERS

To further adjust the length of pull, extra spacer sets are available for many rifle stocks to fit the stock perfectly for the shooter's ergonomics.

MAGAZINES

Sako magazines are known of their high quality and all magazines are available as accessory. If you want to extend your magazine capacity, in most of the models extended magazines are available as well.

SLINGS AND SLING SWIVELS

We have traditional slings and sling swivels available but some rifle models are equipped with QD cups, allowing the use of QD-push button swivels. That provides extreme versatility with the right kind of sling. The 3HGR sling allows numerous ways to be used; it can be tightened against the stock or open the lock and carry the rifle on the back or front, muzzle down or up.

GUN BAGS & TRANSPORT CASES

Perfect way to carry your rifle safely anywhere you go. Our selection include soft gun bags and hard transport cases. Hard transport cases have soft padding inside to keep your rifle and scope unharmed during transportation while soft gun bag is lighter to carry for example in the woods.

CLEANING KITS

With a Sako cleaning kit, you will be able to take good care of your your rifle anywhere. With proper maintenance and cleaning you keep your rifle accurate and add more years to its life span.

OPTILOCK™ SCOPE MOUNTS

A quality rifle deserves quality accessories. The Optilock™ scope mounts perfectly complement Sako manufactured rifles and ensure ultimate accuracy in all circumstances.

The standard Optilock™ base features an indexing edge that makes it easier to tighten the ring without any accidental rotation. All Optilock™ bases have a brand new angular design to perfectly go along with the beauty of the rifle itself.

Optilock™ bases and adjustment rings are offered in multiple different lengths and sizes. This allows for a multitude of different scope sizes and brands to be fitted onto Sako rifles.

All our scope mounts are made from extremely strong material and they are designed specifically to provide a robust scope mount for a demanding user. A variety of different heights and ring sizes ensures that there’s a perfect option for every shooter. The Optilock™ mounts keep the scope aligned and secured during all circumstances. The scope is mounted with the revolutionary ball-bearing rings. Unlike conventional mounts, the Optilock’s polymer rings evenly distribute the clasping force along the shaft of the scope, protecting your optics. The limiter pin in the mount base and the limiter pin slot on the receiver enable fast, secure and accurate mounting of the scope. Newest addition to the Optilock family is the quick release (QR) bases and rings to ensure fast exchange of scope.

NEW FOR OPTILOCK™

Newest additions to the Optilock family are the quick release (QR) bases and rings to ensure fast exchange of scope.

OPTILOCK™ QR BASE PAIRS

- Sako short base pair
- Sako long base pair
- Tikka base pair

OPTILOCK™ QR RING PAIRS

- 1" ring pair (low, medium and high)
- 30mm ring pair (low, medium and high)
- 34mm ring pair (low and medium)
- 36mm ring pair (low)

OPTILOCK™

PICK THE RIGHT OPTILOCK COMBINATION

There's a selection table in Optilock™ packages. This ensures it’s easy to find the correct base and ring combination for your exact needs. More info at sako.fi

OPTISUP SUPPRESSORS

Long-lasting Sako Optisup suppressors, in turn, have been designed to stand the test of both elements and time, so you are never unprepared when taking a shot.

Optisup .22 and .17 are simple and straightforward rimfire suppressors. These two models have a structure where the solid baffle construction can be easily dismantled for cleaning. The .22 version is extremely lightweight due to internal baffles that are made from a durable synthetic material. The .17 version has the same structure, but the baffles are made from aluminium.

- Removable internal baffles for easy cleaning
- Lightweight construction
- Cerakote® surface treatment for optimal weather resistance
- Two models; one for .22 and the other for .17

MODEL	WEIGHT (g)	LENGTH (mm)	DIAMETER (mm)	Bullet channel diameter / max caliber	Available Thread	SOUND REDUCTION in dB*
Optisup .17	154	220	28	7.5mm / 17HMR	½-20 / ½-28	20-29
Optisup .22	124	220	28	7.5mm / 22LR	½-20 / ½-28	19-22

We also have light weighted aluminun suppressors for larger calibers up to 308 Winchester. The surface is cerakote painted "Sniper Grey". This suppressor is available in four different muzzle threads.

- S584202828 Optisup AL M14X1, Max cal. 308Win Sniper Grey
- S584202829 Optisup AL M15X1, Max cal. 308Win Sniper Grey
- S584202830 Optisup AL M18X1, Max cal. 308Win Sniper Grey
- S584202831 Optisup AL 5/8x24, Max cal. 308Win Sniper Grey

KNOW YOUR GAME

We at Sako have a passion for hunting. We firmly believe that it is a truly unique sport, and as such we want to provide you with the perfect cartridge for each situation.

Our history started in 1921 with hand-manufactured firearms and we started manufacturing rifle cartridges in 1928. Even though high technology has since been introduced, we strive to maintain that same level of uncompromising craftsmanship. As hunters, the quality of our cartridges is a matter of pride.

We utilize modern computer-aided R&D and CNC manufacturing methods, yet the final critical steps we carry out ourselves. Each individual brass case is inspected by hand for quality assurance purposes. All Sako cases and bullets are suited for reloading and, with their sturdy quality, are said to outlast the competition. We offer 32 different calibers with more than 100 different loads. All Sako cartridges comply with C.I.P requirements.

Technology is only half of the story; a cartridge is never simply a cartridge. It's an essential part of each hunt, the enabler of each shot. It's something that puts you in charge of the situation. Choosing the correct tool for the task makes all the difference in the world.

To make the selection process easier for you, we have introduced a color-coded system of categorization for our cartridges. Bonded or unbonded? Rapid or controlled expansion? You can know the basics at a glance, so you never have to struggle with the wrong cartridges ever again.

Choosing the right cartridge is no small thing. It's all about respecting your rifle, nature, and the animal you're hunting. With us, you're entitled to demand perfection.

sako
CARTRIDGES

We have a passion for hunting. We firmly believe that it is a truly unique sport, and as such we want to provide you with the perfect cartridge for each situation.

SAKO CARTRIDGES – UNRIVALED ACCURACY AND CONSISTENT PERFORMANCE

When it comes to cartridges, we at Sako never settle for second best. Our legacy of accuracy and performance has proven this time and time again. We combine the latest technology with traditional gunsmith know-how to bring you the best cartridges money can buy. Familiarise yourself with our different product series and pick the right alternative for your rifle and shooting purpose.

RAPID EXPANSION SERIES

Maximised stopping power for small game. Non-bonded core and a lighter jacket. Mainly used for varmint and trophy hunting.

CONTROLLED EXPANSION SERIES

Optimised stopping power and good durability against bone. Bonded core and a thicker jacket. Mainly used for hunting medium and big game.

MONOLITHIC SERIES

Non-lead cartridges with high penetration capabilities and good durability. Maximal weight retention. Mainly used for big game hunting.

TARGET SERIES

Precision performance and optimal aerodynamics. Higher shooting velocity, less bullet drop and wind drift.

SHAPING THE FUTURE OF LEAD-FREE BULLETS

BLADE TIP

Unique tri-blade design

100 % PURE COPPER

Optimal ductility and strength for maximal expansion

MATCH-GRADE PRECISION

Outstanding quality consistency

SAKO BALLISTICS

The Sako Mobile Ballistics App is a free, easy-to-use ballistic calculator that allows hunters and long-range shooters to identify the right cartridge for the given purpose.

The application stores data on all of Sako's cartridges and you can create your own profile for your rifle and ammunition combo.
