

STEINER 
Nothing Escapes You

RANGER 10

A CRYSTAL CLEAR 10 -
VERSATILE FOR YOUR SUCCESS

RANGER 10

STEINER 
Nothing Escapes You

As an innovation leader in the field of hunting optics, we can now expand our popular and globally successful **RANGER SERIES** with the first riflescope with 10x magnification in the premium segment.

The true 1x magnification and a wide field of view of 35.4 m at 100 m make the **RANGER 10** the perfect riflescope for shooting at short and medium distances. These enormously flexible characteristics make the Ranger 10 the most versatile riflescope on the market, with which you can master any challenge - whether driven hunting or stalking.

The outstanding HD optics ensure bright, brilliant and high-contrast images with high edge-to-edge sharpness, and the large eyepiece means you can quickly take aim on driven hunts and capture your target in a matter of seconds. Therefore it enables a fast response to rapidly changing distances in any situation.

FEATURES:

- **INNOVATIVE RIFLESCOPE WITH 10x MAGNIFICATION**

The first 10x magnification in the premium range makes the Ranger 10 the most versatile riflescope on the market.

- **EXTREMELY VERSATILE**

Whether in a driven hunt with an open area or a stalk in the forest, where you have to be flexible between close and medium distances, the Ranger 10 is always a guarantee for hunting success. This is further enhanced by space for mounting attachments such as the Nighthunter C35.

- **TRUE-TO-LIFE IMAGE THANKS TO TRUE 1X MAGNIFICATION**

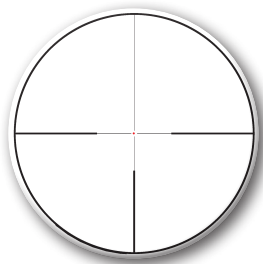

The Ranger 10 overcomes the challenge of optical distortion thanks to a true 1x magnification that ensures an absolutely precise and lifelike image. This ensures that the view through the riflescope is exactly the same as with the naked eye, without any disturbing distortions.

- **HD OPTICS WITH TRANSMISSION VALUES OF 92%+**

Provides reliably bright images thanks to outstanding optical performance. Experience bright, brilliant and high-contrast images with high edge sharpness, outstanding detail recognition and a large eyepiece.

- **EXTREME RUGGEDNESS**

High shot resistance thanks to resistant materials and precise, reliable construction. The excellent mechanical properties of the Ranger series always ensure precise and reliable movement of the adjustable turrets. Water pressure proofness thanks to special sealing techniques - even without cover caps on the turrets. No dust, dirt or moisture can penetrate the interior. Fogging or formation of condensation on the inside of the scope is completely eliminated.

Reticle 4A-I illuminated

RANGER 10 1-10X24

ITEM NO. 3010900204

Ranger 10	Effect. Objective-Ø	Magnification	Field of View at 100 m	Exit Pupil	Eye Relief	Dioptre Compensation	Center tube Ø	Parallax-free	Temperature Range	Length	Weight	Reticle
